Macintosh

The revolutionary ISDN Terminal Adapter with built-in conventional modem. Analogue and digital in one smart design - the TRON TA128-M faxes, surfs the Internet, receives e-mail and makes telephone connections effortless.

The TRON TA128-M can be connected to several telephones through the double POTS connectors. This external ISDN Terminal Adapter is the fastest digital connector with a line speed of 128.000bps but can also exchange data at a line speed of 33k6 with the traditional built-in analogue modem.

This is the ideal combination for those who regularly communicate in the traditional way but want to get the most of their ISDN-connection.

Get rid of your old fax modem. The TRON TA128-M takes over!
